## Sport Timing Solutions T-Shaped Kayak Tag

The T-Shaped Kayak Tag is a specially designed adhesive label which allows accurate reading on metallic or carbon fiber surfaces. This robust tag is strong enough to withstand challenging water and terrain conditions.

The label is affixed to the kayak firmly with the tag extending upright above the surface to prevent any transmission interference caused by the watercraft body. Each label contains a UHF inlay with a unique number associated with each participant in the race. The tag can read up to 14 meters away using UHF reader antennas. Time-keeping is automatically collected and participants' safety is better managed as organizers can know when someone fell behind and might require assistance. In addition, the tag monitors the participants' location and the exact time at which they crossed the finish line. With compatible applications, the tag allows the audience to monitor the athletes progress live, through the race at specific stages.

### Features:

Excellent reading rates

Extra Strong adhesive

Reads up to 14 meters

Water resistant and durable

Great branding options

Easy to apply

### Intended uses:

- Kayak race
- Canoe marathons
- Boat races

# Specifications

<b>Top Layer</b>	Printed Polypropylene
<b>Bottom Layer</b>	Siliconized liner
<b>RFID inlay</b>	Ultra High Frequency (UHF) Passive inlay: ShortDipole Monza 5 Air interface protocol: EPC Gen2 Class 1, ISO 18000-6c Operation frequency: 860-960 MHz
<b>Adhesive</b>	Special purpose rubber base adhesive
<b>Delivery Format</b>	Minimum of 500 labels per order 500 units per roll, Box size 25*25*25 cm
<b>Shelf Life and Storage</b>	12 months from date of dispatch by Tadbik when stored in the original packaging at 15-25C and 50% RH

## Dimensions

Label size (before folding and assembly)

Length: 110mm    Width: 129mm

Applied Label:

Length: 110mm    Width: 70mm    Height: 30mm    Weight: Approx. 3 gram    Thickness: 86µm
