

Barcode and RFID Label Printing Software

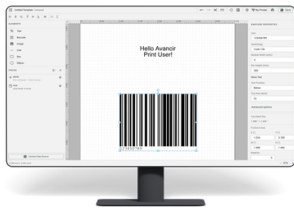

Create labels, connect spreadsheet data, and manage printing from one desktop application.

AvancirPrint simplifies common barcode and RFID label printing workflows by bringing label design, spreadsheet data, and printing tools into one desktop application. Add RFID Capabilities when your workflow requires RFID/GS1 encoding.

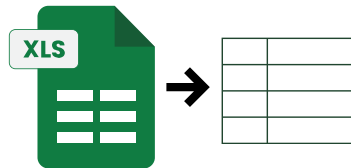

HOW IT WORKS

1 DESIGN LABELS

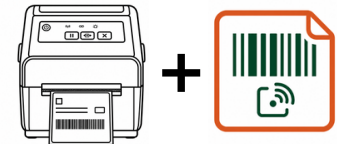

Create print-ready label templates with text, barcodes, QR codes, images, shapes, and dynamic fields.

2 IMPORT DATA

Use Excel or CSV files to map spreadsheet data to label fields and reduce manual entry.

3 PRINT/ENCODE

Print individual labels or batches. Add RFID/GS1 Capabilities when RFID tags need to be encoded.

PRODUCT DETAILS

Subscription	1 Year Recurring
License Type	Workstation-based
Printer Access	Unlimited Printers
Data Sources	Excel and CSV
RFID/GS1 Capabilities	Optional Add-on
Product Support	Standard Support Included
Printer Compatibility	Zebra Industrial & Desktop Printers - See Updated List .

COMMON APPLICATIONS

-  **Inventory Labels**
-  **Asset Labels**
-  **Product Labels**
-  **Retail Labels**
-  **RFID/GS1 Tag Encoding**
