

Hot food self-service for your location.

The Smart Store Hot Hold brings seamless 24/7 hot food service.

Smart Store Hot Hold Key Benefits

Enhanced Revenue Potential

Boost revenue with self-service enabling **faster throughput** during busy peak hours - all while **reducing front of house labor** costs.

Secure Pickup Order Solution

Unique access codes ensure only the right person can access their food, enabling better online delivery service experiences.

Secure & Reliable Technology:

With a **99%** accuracy, our solution uses weighted shelf technology to monitor and track items removed from the store, eliminating theft.

Food-Safe Heating System

Maintains temperatures up to 158°F with adjustable settings to keep food safe, and ready to be consumed throughout the day.

Smart, Always-Ready Meal Access.

Eliminate lines and secure meal pick-ups, all without the need for more staff.

Quick Facts

- **Stock fresh, hot food** like soups, warm sandwiches, and pre-cooked meals.
- Pass-through design allows restocking from the back and selling from the front.
- Hygienic, food grade stainless steel construction
