

# Meet the all-new Smart Store Series

**The industry's most reliable and secure smart store solution.**

## **Your anti-theft smart store.**

Leveraging **proven weighted-shelf and camera monitoring technology**, operators get piece of mind knowing they can minimize shrinkage, while still giving their customers a frictionless experience.

- 99% accuracy rating
- Detects as little as 15 grams
- Built-in cameras at top of cabinet door for monitoring "suspicious activity"
- Easily locate video footage, stored up to 90 days, inside of the back-end platform\* *(included in your monthly services, no additional camera systems required)*

<sup>1</sup>\*On average, dependent on transaction volume.

## Smart Store 600 & 700: Key Features

### Enhanced Customer Experience

Your customers will enjoy hassle-free shopping experiences by easily tapping their card to open the cabinet(s), grab their product(s), and go.

### Secure & Reliable Technology

With 99% accuracy, our solution uses weighted shelf technology and cameras at the POS to monitor and track items removed from the store.

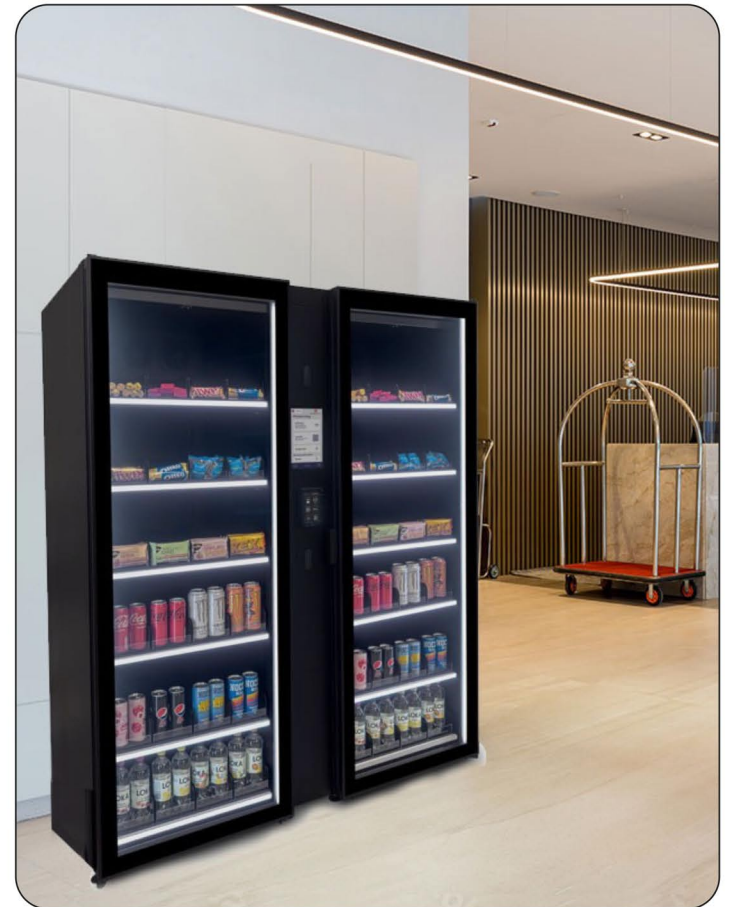

### Turn-Key Setup & Installation

Easily add in or change products all at the point-of-sale (POS) or in the back-end management platform, with audio and visual prompts to make service stops a breeze.

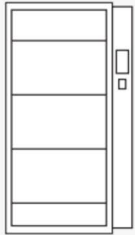

### Flexibility to Scale Store Size

Start with one cabinet or scale up to 4 units connected to one POS terminal. The 600 & 700 Series offer various size and capacity options.

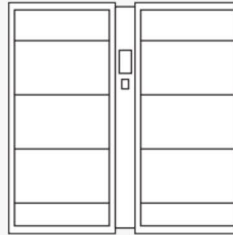

# Smart Store 600

Modular to fit in a variety of locations.

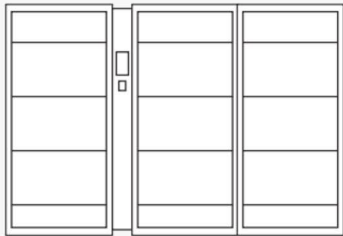

## Smart Store 600

Single cabinet with touchscreen.  
32" W x 26" D x 72" H

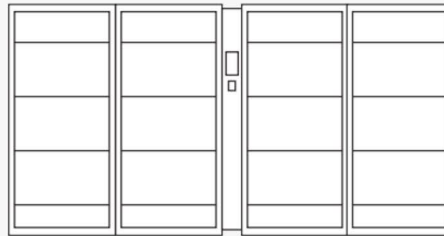

## Smart Store 600 Duo

2-cabinet setup with touchscreen in center.  
54.6" W x 26" D x 72" H

## Smart Store 600 Trio

3-cabinet setup with touchscreen in center.  
82" W x 26" D x 72" H

## Smart Store 600 Quad

4-cabinet setup with touchscreen in center.  
109" W x 26" D x 72" H

### Note:

The Duo is designed to allow for expansions with additional units after installation. **Single units cannot be expanded.**

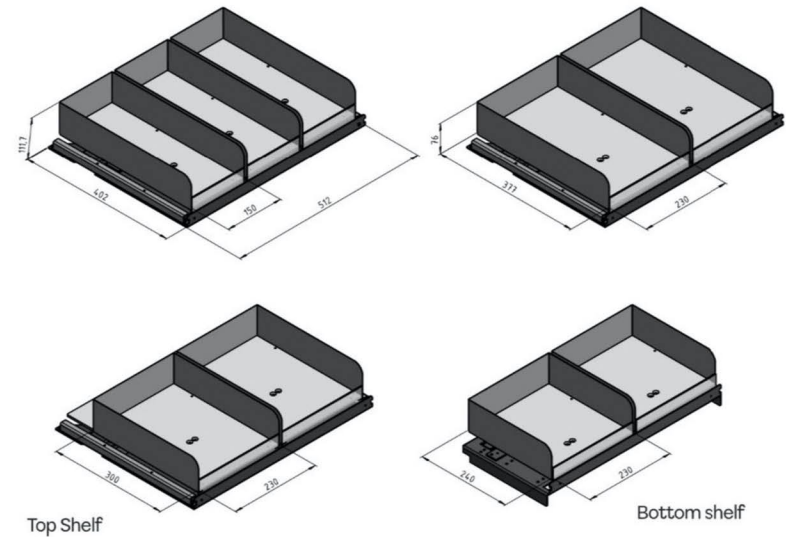

# Smart Store 600

## Shelf & Tray Setups/Configurations

### Standard Configuration:

- Includes 6 shelves (18 trays)
  - Bottom tray is shorter due to compressor (9.4" D)
  - Top tray is shorter due to fan (11.8" D)
  - 3 trays on each shelf (5.9" W each)
  - Ability to adjust shelves to accommodate 20oz bottles (may require to drop down to 5 total shelves in unit vs. 6)
  - Optional add-on shelf rollers available
- *Dividers are not adjustable. There is a load cell in each tray to manage weight and balance.*
- *Best practice is to double up the product if more than one tray is needed.*

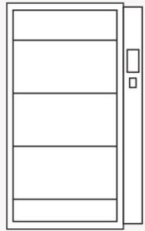

### 600 Collection

Note: It is not possible to change top and bottom shelves

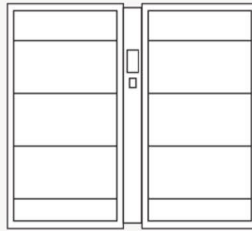

# Smart Store 700

Modular to fit in a variety of locations.

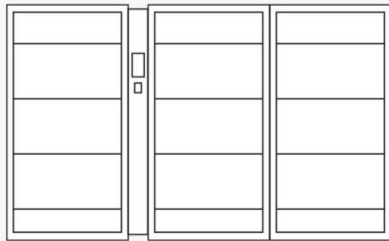

## Smart Store 700

Single cabinet with touchscreen.  
*35.25" W x 31" D x 77" H*

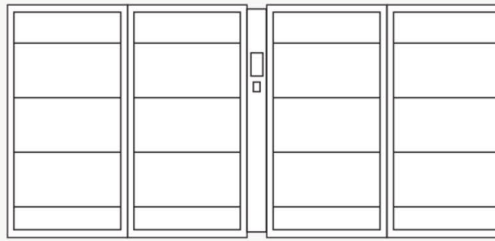

## Smart Store 700 Duo

2-cabinet setup with touchscreen in center.  
*63" W x 31" D x 77" H*

## Smart Store 700 Trio

3-cabinet setup with touchscreen in center.  
*99" W x 31" D x 77" H*

## Smart Store 700 Quad

4-cabinet setup with touchscreen in center.  
*134" W x 31" D x 77" H*

### Note:

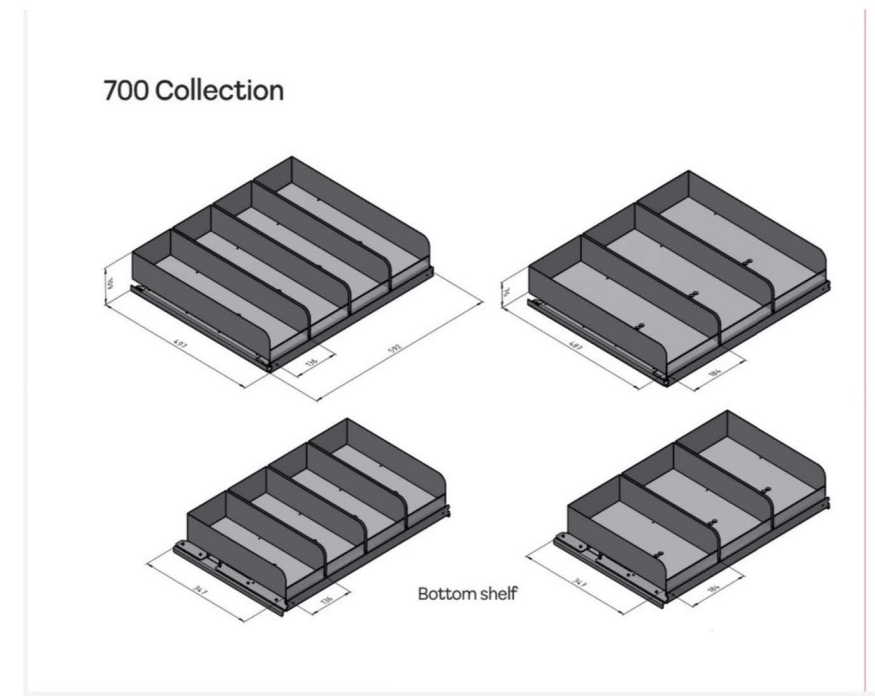

The Duo is designed to allow for expansions with additional units after installation. **Single units cannot be expanded.**

# Smart Store 700

## Shelf & Tray Setups/Configurations

### Standard Configuration:

- Includes 6 shelves (24 trays)
  - Bottom shelf/tray is shorter due to compressor (13.6" D)
  - Top shelf/tray is shorter due to fan (13.6" D)
  - 4 trays on each shelf (5.35" W each)
- *Dividers are not adjustable. There is a load cell in each tray to manage weight and balance.*
- *Best practice is to double up the product if more than one tray is needed.*

# Smart Store Series, Specs

## Technical Specifications:

Connectivity: 4G LTE (Opt-Connect), SIM Card (T-Mobile), Ethernet

Payment Methods: EMV Contact/Contactless, NFC/RFID, Magstripe, Mobile Wallet, Campus Cards (swipe)

Power Supply: 110V/220V

Battery Back-Up (10 - 15 min.)

Tray can sense as low as 15 grams (breath mint size). For calibration we use a 1-kilogram weight.

*(every machine gets a calibration ball)*

Indoor/Outdoor Options

*Outdoor should be under awning or may require a surround to be built.*
