New BarTender Print Connector for Dynamics 365 Business Central	Integration Builder or BarTender REST API *(Available with BarTender Enterprise/Automation Edition)*	Connector available for no additional charge in Dynamics 365 Supply Chain Management release 10.0.34	Integration Builder or BarTender REST API *(Available with BarTender Enterprise/Automation Edition)*

World-class labeling integration has never been easier for Microsoft Dynamics 365:

Microsoft Dynamics 365 Business Central

BarTender Cloud Automation

New BarTender Print Connector for Dynamics 365 Business Central

For organizations focused on agility and scalability, BarTender's easy integration with Microsoft Dynamics 365 Business Central delivers printing solutions that are built to support and evolve with your business.

Easily map your Business Central data to your label templates and print—with no programming or coding required.

The BarTender Print Connector automatically syncs label templates and available BarTender Cloud printers to your Business Central account to enable easy and simple label printing.

BarTender On-Premise

Integration Builder or BarTender REST API
(Available with BarTender Enterprise/Automation Edition)

For integrating your on-premise BarTender Software to Microsoft Dynamics 365 Business Central (or any ERP or business application), the following options are available:

1. Easy no code/no programming integration with BarTender Integration Builder
2. Tailored integration with the BarTender REST API

You can also enjoy these other capabilities and services:

- Tap into easy-to-use WYSIWYG label design with BarTender Designer
- BarTender Professional Services are available to help assess and perform the best approach for integration

Microsoft Dynamics 365 Supply Chain Management

BarTender Cloud Automation

Connector included in Dynamics Supply Chain Management release 10.0.34

Combine the powerful enterprise capabilities of Microsoft Dynamics 365 Supply Chain Management with BarTender, the most trusted labeling solution in the cloud.

There's no longer a need to configure printing using complicated ZPL printer code. You can now integrate with BarTender Cloud for an easier way to design and print your labels. This new Warehouse Management feature was developed by Microsoft with our technical assistance.

BarTender On-Premise

Integration Builder or BarTender REST API
(Available with BarTender Enterprise/Automation Edition)

For integrating your on-premise BarTender Software to Microsoft Dynamics 365 Business Central (or any ERP or business application), the following options are available:

1. Easy no code/no programming integration with BarTender Integration Builder
2. Tailored integration with the BarTender REST API

You can also enjoy these other capabilities and services:

- Tap into easy-to-use WYSIWYG label design with BarTender Designer
- BarTender Professional Services are available to help assess and perform the best approach for integration
