

CINDER

WHITE WET INLAY

The Vulcan RFID Cinder White Wet Inlay is an NFC (Near Field Communication) tag used for the close range identification of various electronics and apparel.

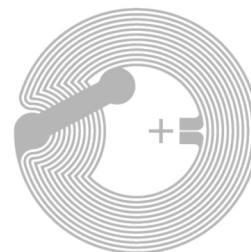

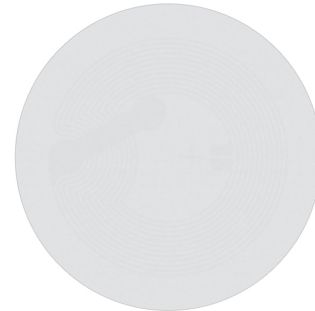

With the Vulcan RFID Cinder, NFC-enabled smartphones can act as the RFID reader.

Embedding the Vulcan RFID Cinder in posters, signs, menus, labels, and business cards enables the immediate launch of smartphone applications or social media websites when read by a smartphone.

The Vulcan RFID Cinder carries significantly more data than barcodes and QR codes and can be password protected unlike the printed alternatives.

The Vulcan RFID Cinder is great for tagging many assets and materials in a variety of applications, including but not limited to:

- User Experience
- Product Identification
- Marketing
- Brand Protection
