Product Code | VUL-USB-EMBER-US

EMBER

USB Reader

The **Vulcan RFID Ember USB Reader** is a compact, versatile UHF RFID reader ideal for a variety of applications. About the **size of a deck of cards**, it features a **built-in antenna** for precise tag readings. With **two operating modes**—autonomous for automatic reads and transparent for software development—this reader has the flexibility to meet both straightforward and complex deployments.

Ready out of the box with plug-and-play setup, **keyboard wedge emulation** enables automatic input of tag data into any system.

The **Vulcan RFID Ember** is compatible with Vulcan RFID Read, Write, & Verify Software, and has support for **Windows, Mac, and Linux** systems.

A compact design that uses a **single USB cable** for power and data enables the **Vulcan RFID Ember** to support a wide range of applications, such as:

- Access control
- Retail product management
- Healthcare equipment monitoring
- General tag encoding

*Depending on order volume, the **Vulcan RFID Ember** can be designed with a **custom faceplate, connector type, or color** to align with your brand or application.*
