

Circular Polarity RFID Panel Antenna

S9028PCL S9028PCR (with 4 mounting studs)

902-928 MHz 8.5 dBic CIRCULAR POLARITY PANEL

The RFMAX S9028 antenna is a circularly polarized panel that provides reception and transmission of signals in the 902-928 MHz frequency band. The antenna achieves maximum efficiency and performance across the entire frequency band.

Both VSWR and axial ratios are excellent and allow the user to achieve the maximum performance for an antenna of this type. The antenna is housed in a heavy duty radome enclosure that can be directly wall mounted, An optional articulating mount allows either wall or mast mounting.

The antenna is offered with an integrated coax pigtail and a variety of connector types are available.
